

MPI

Comprehensive digital multi-point inspection

16%
lift in customer pay
per RO

Higher customer satisfaction with digital inspections.

Go paperless and ensure higher MPI completion.

Discover dealer- and customer-friendly digital inspections that will drive more upsells, create efficiency, and enhance communication. Instant vehicle status updates, detailed inspection reports, intuitive dashboards, and both photo and video functionality ensure MPI gets recommendations to the customer while the vehicle is still being serviced. And convenient parts importing ensures your techs don't have to loiter at the parts counter.

Key Features:

- Photo and video capabilities to capture and share every repair order opportunity
- Complete near-real-time parts search, including imported parts data via MOTOR or your supported DMS
- Ability to filter the main MPI Ledger by workflow events
- Real-time repair order status updates among staff via the MPI app, SMS, and email
- Custom workflows for Express Service, in-depth inspections, and more
- Multiple inspection templates to help customize by inspection type
- Detailed reporting dashboard
